USPACOM Interagency Focus

USPACOM IA activities, both in training and operations, are focused in four domains:

- Joint Interagency Coordination Group-Counter Terrorism (JIACG-CT)

- Joint Interagency Task Force – West (JIATF-W)

- J7 (Training, Transformation and Analysis)

- J5 (Full Spectrum, Joint Interagency Coordination Group (JIACG)

Following slides outlines the IA participation, integration, and value

JIACG-CT

A separate Directorate established in 2002 with the single focus of accomplishing the Command's CT Campaign plan. Directorate is headed by a Navy Captain, 22 military personnel and is integrated with 6 IA,s from CIA, Treasury, Justice, State, DIA, and USCG.

JIACG-CT is the Commander's primary enabler to integrate and merge the IA and military capabilities into a single focused effort against terrorism.

Goals: - Refine Common Operating Picture

- Develop Partner Nation CT capabilities

- Build regional consensus enabling necessary sovereign actions to counter maritime transnational threats. Facilitate and unify the effort by aligning inter-ministerial and interagency maritime security capabilities.

Training: Plans and conducts three (3) annual CT seminars within the region with full IA participation. Key IA players are DOS, DEA, DIA, and CIA.

JIATF-W

JIATF-W is the Commander's key organization focused on planning and conducting CD detection and monitoring operations to include supporting US Country Teams and Partner Nation Counter Drug forces by providing processed intelligence and operational information IOT support successful "end game" operations.

JIATF-W has recently relocated from California and is currently reorganizing and repositioning its operations to reflect current mission set. Currently, the organization has 42 assigned military and government personnel which includes 9 IA's from DEA, ATF, USCG, DIA, NSA, Treasury and DOS.

Goals:
- **Develop Partner Nation CD capabilities**
- **Refine Intelligence Collection Processes**
- **Develop Regional Fusion Centers**

Training: Plans and conducts MTT with Partner Nations to improve police and military CD capabilities. DEA are full partners and integrated within the training effort.

J7, Training, Transformation, and Analysis

J7 Directorate designs, coordinates, exercises, and assesses training programs for a diverse array of audiences throughout the USPACOM AOR, and leverages the capabilities of the Pacific War Fighting Center, in order to improve war fighting capability, joint and combined interoperability, and theater security cooperation.

The J7 currently has 19 Joint and or Combined exercises planned for FY05. The following exercises are the key priority exercises for the Command and have full IA integration.

- **Terminal Fury (DOS, CIA, DIA, USCG, NSA are key players)**
- **Ellipse Charlie (DOS, CIA, DIA, NSA are key players)**
- **Cobra Gold (DOS, DEA, CIA, NSA, DIA, Treasury are key players)**
- **Balikatan (DOS, DEA, CIA, NSA, DIA, are key players)**

J5, Strategic Planning and Policy

The Director for Strategic Planning and Policy supports the Commander, US Pacific Command by developing, coordinating and implementing military instruments of power in support of our national, diplomatic, and economic policies; regional strategy; strategic and contingency plans; and theater force structure and war fighting requirements pertaining to the USPACOM area of operations.

The FS JIACG is currently being evaluated within the J5 oversight. Currently, no Command assets have been allocated. However, during the recent "Terminal Fury" Exercise (Dec 04 timeframe), sufficient data has been collected so that the staff is currently conducting analysis to determine size, organization, functions, CII, and costs.
